

We had our Third Andean Workshop in Lima, in November 12-16, 2019

The workshop lasted for five days and was hosted by Universidad Nacional de Ingeniería.

We had close to 100 attendees from all countries in the Andean ROAD (Colombia, Chile, Ecuador, Peru, Venezuela) except Bolivia.

The format of the workshop was the following:

- 25 technical talks on different research aspects in the region. The highlight was the recent instrumentation development in Peru (i.e. the commissioning of a new 1 meter telescope in southern Peru).
- A series of lectures aimed at undergraduate students. The lecturers and the themes were:
 - Dante Minniti (Chile). The Milky Way: Structure and Evolution.
 - Gonzalo Tancredi (Uruguay). Astronomical Techniques in Planetary Science.
 - Paulo Bretones (Brazil). Astronomy in the School.
 - Susana Deustua (USA). Observational Cosmology.
- Three round tables on the successes and challenges of our three task forces (Research & Universities, Children & Schools, General Public)

More details can be found in the event webpage: <http://vri.uni.edu.pe/index.php/3waa/>

The Workshop was a success. We plan to have the Fourth Workshop in Ecuador in 2020.
